

Integrated base station and outdoor

Overview

What is integrated base station (IBS)?

Industry-leading 4G/5G core network products and flexible cooperation modes to speed up the industry private network deployment for operators, virtual operators, and integrators. Integrated base station (iBS) is an outdoor station for use in the wireless broadband trunking communications system.

What is a tetra integrated base station?

The TETRA integrated Base Station (iBS) is a base station suitable for outdoor and indoor operation. Thanks to its small size and lightweight, the TETRA iBS is easily transported, flexibly mounted, and quickly deployed, which reduces the networking cost. The TETRA iBS can be mounted on walls and the top of antenna masts.

What is x4000 5G SDR small cell outdoor base station?

X4000 5G SDR Small Cell Outdoor base stations enjoy great flexibility, high performance as well as very low cost of operation and ownership. "Stand Alone" operation is possible which enables the 5G Base station to connect remote terminals without need for external network elements.

What is a 5G small cell base station?

5G Small Cell indoor and outdoor 'all-in-one' radio access for private 5G wireless networks. 5G Small Cell Base Stations (Micro Cell, Femtocell) offer advanced features and "stand alone" capability for private networks.

Why should you choose Hytera 4G & 5G base stations?

Hytera's 4G/5G dual-mode base stations feature high integration, large capacity, and strong coverage capabilities, available in various forms such as integrated and distributed solutions. They support open collaboration with industry partners to meet the needs of both carriers and private network customers.

Where can the Tetra IBS be mounted?

The TETRA iBS can be mounted on walls and the top of antenna masts. Want to Learn More About Hytera Products and Solutions?
