

# Israel Solar Energy Storage Project

## Overview

---

Israeli renewable energy company Nofar Energy Ltd will develop over 1 gigawatt-hour (GWh) of energy storage capacity across 60 locations in Israel. These locations belong to the retail chain Machsanei HaShuk. The estimated investment for the project is 500 million Israeli shekels (USD 135.1 million). How many solar-plus-storage projects are there in Israel?

As of September 2023, Israel has two solar-plus-storage projects, with the first being the Arad Valley 1's 17-MW solar farm with an energy storage system of 31 MWh, and the second being Sde Nitzan 's 23 MW of solar and 40 MWh of storage capacity project.

How many high-voltage energy storage projects are there in Israel?

To support this transition, Israeli network operator Nega Company ran a tender in July 2024 which attracted offers from 11 bidders for the construction and operation of 29 high-voltage energy storage projects, totaling approximately 4 GW with each project offering a storage capacity for at least four hours.

How many mw can a battery store in Israel?

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store between 1,300 and 1,900 MWh of energy.

How does Israeli solar power work?

Using energy from the sun, the tower generates enough electricity to power tens of thousands of homes. Completed in 2019, the plant showcases both the promise and the missteps of the Israeli solar industry, and it is a case study in the unpredictable challenges that await any country seeking to pivot from fossil fuels to renewable energy.

Should Israel build solar energy plants in the Negev desert?

The Negev Desert and the surrounding area, including the Arava Valley, are the sunniest parts of Israel, and little of this land is arable, which is why it has become the center of the Israeli solar industry. David Faiman thinks the energy needs of Israel's future could be met by building solar energy plants in the Negev.

How much does it cost to build a storage facility in Israel?

The two facilities – Neot Smadar and Ohad in southern Israel – will operate under regulated tariffs for five years before gaining merchant market access. The projects must begin operations by 2028, with construction costs estimated at \$210-250 million. This latest award accounts for 20% of the capacity allocated in Israel's first storage tender.
