

Japanese outdoor energy storage

Overview

What is Japan's energy storage landscape?

Japan's energy storage landscape is widely distributed across the whole of Japan, geographically-speaking. Furthermore, Japan's energy-storage landscape is characterized by its connection with Japan's smart-grid and smart city landscape. a. Interactive Map of Japan's Energy Storage Landscape.

Does Japan need energy storage?

Also highly-relevant in shaping structural demand for energy storage Japan's post-Fukushima energy market landscape, has been the rise of Japan's Smart City plans. In principle, the smart city concept also needs energy storage in order to help regulate energy demand management systems.

What role does energy storage technology play in Japan's Energy Future?

Given the fundamental direction of Japan's energy landscape, energy storage technology is set to play an integral part in Japan's energy future due to energy storage technology's role in both smart grid technology and in renewable energy's integration into Japan's energy landscape.

What is the future of energy storage in Japan?

Other small-scale uses, such as data center backup energy storage are projected by NEDO to become commercially widespread in Japan before 2020. Overall, large and centralized storage technologies have been mature for a longer period of time. In Japan and in the EU, research and development efforts are heavily focusing on batteries.

Does Japan have a large-scale energy storage infrastructure?

Figure 16, is a snapshot of the interactive map of Japan's large-scale energy storage geography, as well as its smart-grid and smart-city landscape. Overall, the map demonstrates that Japan has a visible overlap between its smart-grid infrastructure and the country's energy storage sites.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.
