

Mauritius Energy Storage System Supply

Overview

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of achieving 60% renewable energy in the electricity mix by 2030. Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

How does Mauritius generate energy?

Mauritius generates energy through various means including wind farms, solar energy, biomass, wave, and waste-to-energy projects. Currently, bagasse (sugarcane waste) is the leading source, contributing 13.3 percent to the renewable energy generation. Mauritius derives other renewable electricity from hydro, wind, landfill gas, and solar.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m²/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

How has the Mauritian government changed the energy sector?

The Mauritian government has made significant changes in the energy sector. In particular, it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to promote the use of renewable energy in Mauritius.

Mauritius Energy Storage System Supply

[Design, Manufacture, Supply, Installation, Testing and ...](#)

This tender is from the country of Mauritius in African region. The tender was published by CEB on 24 Oct 2024 for Design, Manufacture, Supply, Installation, Testing and Commissioning of ...
