

Microinverter Omnik

Overview

How can I obtain data from an Omnik inverter?

For older Omnik inverters, it is not possible to get the data straight from the inverter. However, newer inverters listen at port 8899 and are able to respond directly. The datalogger in the inverter sends an update about every 5 minutes to a fixed IP of a logging server in the Solarman datacenter.

Does omnikportal work with all inverters?

Not all Omnik inverters and not all firmwares are supported. If your inverter does not have the option to use a "Remote server" or only "Server B", Omnikportal will unfortunately not work for you. Unfortunately, you will not find out until you have largely completed the installation process. Step 1/4. Estimated time required: > 3 minutes.

How do I Find my Omnik inverter serial number?

Step 3/4. Estimated time required: > 10 minutes. Make sure you are still logged in (step 2). In your Omnik inverter find the inverter ID (sometimes called serial). On the 'status' page (see above) you find your 'Inverter serial number'. Copy and paste this number in the dashboard from this Omnik Portal (see below). Still no luck?

.

How long does omnikportal take to see data?

Now keep an eye on the omnikportal.net dashboard. During daylight it should take max 5 minutes to see data on the dashboard. If it is evening or night it can take up to 12 hours before the first results are visible! Does your inverter have its own date and time?
