

Myanmar Industrial Energy Storage Transformation

Overview

Is Myanmar progressing in transport infrastructure?

Evidence of further progress in transport infrastructure in Myanmar is clear through the paved highway network, which increased by 35 percent. The country is developing at around 6 to 7 percent; however, according to the ADB, further investment in transport infrastructure is necessary to completely develop the transport sector.

How to estimate the total energy consumption of Myanmar industries?

At the national level, this will also need the total production of the sub-sector to estimate its energy consumption. In conclusion, the national production or gross value added of the sub-sectors is very important in estimating the total energy consumption of Myanmar industries. The parking lot survey was conducted in several areas of Yangon.

How is energy used in Myanmar?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.
