

Nauru solar power system manufacturer

Overview

Does Nauru have solar power?

Due to its equatorial location, Nauru has limited need for hot water, which has limited interest in solar applications. Currently, all energy on Nauru is provided from predominantly fossil fuels for electricity generation.

Are there solar hot water systems on Nauru?

There are only a small number of solar hot-water systems on the island, most of which are in need of substantial maintenance. Solar photovoltaics have not been used as an energy source on Nauru as the island is 100% electrified by grid-distributed power.

How will Nauru Utilities Corporation benefit from project preparatory technical assistance?

The project will also support the institutional strengthening of Nauru Utilities Corporation. Project preparatory technical assistance was used to carry out project-enabling activities such as a Solar Power Expansion Plan for Nauru, project feasibility study, detailed design, and plant procurement contract bidding documents.
