

# **Netherlands Energy Storage Battery Chassis Manufacturer**

## Overview

---

What is the largest battery energy storage system in the Netherlands?

"The Alfen team is very excited to see the biggest project in our agreement with SemperPower come to life as the largest battery energy storage system in the Netherlands. This project clearly demonstrates the power of what's possible when two Dutch companies join forces and employ their strengths to build game-changing renewable energy assets.

Will energy storage be a big deal in the Netherlands?

Energy storage is also relatively new for the Netherlands' distribution system operators (DSOs) and there is a variety in the approaches they are taking. There is still a fear of what batteries might do on the grid, Stuyt says, like the theoretical possibility they discharge onto the grid when solar PV is at max output.

How much energy does a Bess battery storage system store?

The 45MW/ 90Mh utility-scale BESS will on average store enough energy supply equivalent for 21.500 households per day. Construction is set to commence in the coming months. Equans Netherlands will take charge of the engineering and construction of the battery storage system.

What is semperpower's largest battery energy storage system?

SemperPower brought online a 30.7M/62.6MWh battery energy storage system (BESS) in November 2023, (Castor) followed a month later by another, larger project at 30MW/68MWh (Pollux), the two largest BESS units in the country. Prior to that, the largest was a 24MW/48MWh system from another firm GIGA Storage.

Will a battery energy storage system work in 2021?

"In 2021 we successfully launched the first large-scale battery energy storage system together with Alfen," said Dennis Schiricke, CEO of SemperPower.

“Since then, local system operators have seen explosive growth in requests to connect battery energy storage systems to their grids.

## Netherlands Energy Storage Battery Chassis Manufacturer
