

New energy storage company in Gabon

Overview

What is a natural gas plant in Gabon & Wärtsilä?

Developed by Gabon Power Company in partnership with Wärtsilä under a build-own-operate-transfer IPP model, the plant will primarily utilize natural gas from Gabon's offshore fields to generate electricity, addressing both growing domestic demand and facilitating regional energy trade.

Why is Gabon a potential energy hub?

Key infrastructure developments, such as the Owendo plant and floating power solutions, position Gabon for long-term energy security and enhance its potential as a regional energy hub. This electrification push also creates a wealth of opportunities for service companies specializing in gas-to-power infrastructure and operations.

How will Gabon expand its power generation capacity?

The demand for advanced technology, skilled labor and power generation services will continue to rise as Gabon expands its electricity generation capacity, presenting significant opportunities for companies in gas extraction, power generation and transmission.
