

Non-domestic inverter

Overview

What are the different types of solar inverters?

When it comes to home solar installation, homeowners have three types of solar inverters to consider: string inverters, string inverters with DC power optimizers and microinverters. Each inverter setup comes with upsides and downsides. Here's what you should know.

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

How long do solar inverters last?

Most inverters last 10–15 years, but premium brands like Enphase and SolarEdge offer warranties up to 25 years. Inverters are essential for converting solar panel DC output into home-usable AC power—your solar system won't work without one.

How do I choose a transformer or transformerless inverter?

Choosing the Right Inverter for Your Needs When deciding between transformer and transformerless inverters, several factors come into play. Consider your specific requirements, such as the size of your solar power system, the available space for installation, and your budget.
