

On-site energy powered by solar panels

Overview

Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage. These systems can typically offset a large portion of energy consumption in a building and are relatively simple to install.

On-site energy powered by solar panels

[Onsite Energy Technologies , Better Buildings Initiative](#)

Onsite energy refers to electric and thermal energy generation and storage technologies that are physically located at a facility and provide alternative energy services directly to the site.
