Overview

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

What are the performance metrics for portable power stations?

Currently, we look at two main performance metrics for portable power stations: charge time and discharge capacity. Every company that sells portable power stations provides the expected number of watt-hours its products are supposed to last. That can vary from as low as 240 watt hours to as many as 2,000 watt hours for a larger power station.

What should I consider when buying a portable power station?

The most important thing to consider when shopping for a portable power station is the amount of power and battery capacity you need. The price range for portable power stations can range from a fairly inexpensive product to a large-sized investment.
