

PV array connected in series with inverter

PV array connected in series with inverter

[Series, Parallel & Series-Parallel Connection of PV Panels](#)

There are two main types of connecting solar panels - in series or in parallel. You connect solar panels in series when you want to get a higher voltage. If you, however, need to get higher ...

[Project design > Grid-connected system definition > Sub-arrays](#)

In Grid-connected projects, the "system" is defined as the set of components constituting the PV-array, i.e. the PV modules, strings, inverter, up to the connection to the grid.

[What is a String Solar Inverter and How Does it Work?](#)

Solar string inverters are electrical devices that convert the direct current (DC) generated by solar panels into alternating current (AC) that businesses can use. They are usually installed in a ...
