

Pakistan buys stone for solar panels

Overview

Why is Pakistan a top buyer of solar panels?

This surge represents a doubling of the previous year's imports, and makes Pakistan one of the top global buyers of solar panels. The scale of Pakistan's imports is particularly striking because it is not driven by a national programme or utility-scale rollout.

Why is Pakistan a big market for solar energy?

Pakistan has quickly become one of the world's biggest markets for solar energy. This solar boom has been driven in large part by consumers who are fed up with sky-high electricity costs. The White House is one step closer to defunding public radio.

Did Pakistan import more solar panels in 2024?

And yet, by the end of 2024, Pakistan imported more solar panels than almost any other nation in the world. The South Asian country, facing economic challenges and high energy poverty, is witnessing one of the most unexpected clean energy success stories of the decade.

Is solar a viable energy solution in Pakistan?

Falling equipment prices, combined with volatile local fuel costs and persistent power shortages, have made solar one of the most economically viable energy solutions in Pakistan today. Despite this, significant gaps remain in how the transition is being managed.

Does Pakistan have a solar power grid?

Despite importing record volumes of solar panels, Pakistan's official grid-connected solar capacity remains far lower, indicating that much of the new solar is operating off-grid or behind the meter, where it escapes inclusion in national electricity statistics.

Are rooftop solar installations a mean for low-cost power in Pakistan?

According to Ember's report, rooftop solar installations in homes and businesses in the country has soared as a "means of accessing lower-cost power". Pakistan's experts echo this analysis.
