

Pakistan substation communication base station

Overview

Dasu Substation is a 765kV substation located at Dasu Hydropower Station, Khyber Pakhtunkhwa, Pakistan. The substation is under construction and is expected to be commissioned in 2024. The Das.

How much transmission capacity does Pakistan have in 2022?

Pakistan had 124,435MVA of capacity in 2022 and this is expected to rise to 156,049MVA by 2028. Listed below are the five largest transmission projects by capacity in Pakistan, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global transmission segment.

Where is Dasu substation located?

Dasu Substation Dasu Substation is a 765kV substation located at Dasu Hydropower Station, Khyber Pakhtunkhwa, Pakistan. The substation is under construction and is expected to be commissioned in 2024. The Dasu Substation will be operated by National Transmission & Despatch Co Ltd.

What is the voltage level of Dasu substation?

The designed voltage level of the substation is 765kV and the operating voltage level is 765kV. The step in voltage of the project is 765kV. Upon completion, the substation will be able to operate at 500MVA. Dasu Substation is owned by National Transmission & Despatch Co Ltd. Buy the profile here. 2. Islamabad Substation.

What is the voltage level of a substation?

The designed voltage level of the substation is 765/500/220/132kV and the operating voltage level is 765/500/220/132kV. The step in voltage of the project is 765kV and the step out voltage is 132kV.
