

Photovoltaic cells from Portugal s container battery factory

Overview

Where is the first photovoltaic & lithium battery factory in the world?

The first factory in the world to simultaneously produce flexible photovoltaic panels and lithium batteries is already operating in Moura, after an investment of five million euros, the manager revealed today.

How many photovoltaic panels & invertors will be installed at Azambuja?

The two new installations contain approximately 11 250 photovoltaic (PV) panels and 70 invertors, which would produce enough energy to supply over 1500 homes. The installations will reduce carbon emissions by 23% at the Castanheira do Ribatejo factory and by 19% at the Azambuja recycling plant.

What makes Moura photovoltaic panels different?

With regard to the photovoltaic panels being produced in Moura, Miguel Matias emphasised that “the biggest differentiator is the flexible and very light technology”, which allows them to be installed in “previously impossible places”.
