

Photovoltaic inverter market development

Overview

The market size for PV inverter was valued at USD 34.6 billion in 2024 and is projected to reach USD 90 billion by 2034, growing at a CAGR of 9.5% during the forecast period.

PV Inverter Market size was valued at USD 13.32 billion in 2023 and is estimated to expand at a CAGR of 7.7% between 2024 and 2032. A photovoltaic inverter, referred to as a solar inverter, is an essential device in a solar energy system. It converts DC (direct.

The global demand for solar energy has been steadily increasing owing to the enhanced efficiency of these systems. Higher efficiency means that more of the captured sunlight is.

The worldwide outbreak of coronavirus has had tremendous impact on the economy around the world. The COVID- 19 influenced the supply chain, elevating the prices of.

String PV inverter market dominated around USD 13.9 billion revenue in 2022. String inverters, which process the DC electricity from.

What is the growth rate of solar PV inverter market in 2024?

By inverter type, central systems commanded 55% revenue share in 2024, while microinverters are projected to register the fastest 8.1% CAGR by 2030. By application, utility-scale installations accounted for 63% of the solar PV inverter market size in 2024, while residential is set to grow at a 7.6% CAGR through 2030.

What is the global solar PV inverters market size?

Reuse requires attribution under CC BY 4.0. Image © Mordor Intelligence.
Reuse requires attribution under CC BY 4.0. The Solar PV Inverters Market size is estimated at USD 14.27 billion in 2025, and is expected to reach USD 19.89 billion by 2030, at a CAGR of 6.87% during the forecast period (2025-2030).

How is the solar PV inverters market segmented?

The solar PV inverters market is segmented by inverter type, application, and geography. By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters.

How competitive is the market for PV inverters?

The market for PV inverters is highly competitive and moderately fragmented due to the presence of numerous market players. The dominant trend in operations of these solar companies includes vertical integration, which defends against market power and reduces competition.

What is the value of PV inverter industry?

Based on the product, the industry is segmented into string, micro, and central categories. The PV inverter market was valued at USD 25.5 billion, USD 29.9 billion, and USD 34.6 billion in 2022, 2023, and 2024, respectively.

Why are solar PV inverters so popular?

The constant economic growth in nations such as the U.S., China, and India as well as developments in supply chain and favorable government policies supporting PV inverter production in the U.S. and India are driving demand for solar PV inverters.

Photovoltaic inverter market development

[2025 Top 20 Global Solar Inverter Brands Revealed by PVBL](#)

4 days ago · As differences in market layout and technological R&D expand between companies, future performance differentiation will become more pronounced. In the long term, global ...

[Photovoltaic Inverter Market Size, Share, Trends & Forecast 2032](#)

Photovoltaic inverters also described as solar inverters, these are a kind of power changers that converts shifting DC production of a photovoltaic solar cell into AC output. Such AC streams ...

[Utility Scale PV Inverter Market Size & Share, Growth Statistics ...](#)

Utility Scale PV Inverter Segmentation Product (String, Central) The central segment is expected to hold 54% share of the global utility scale PV inverter market by 2037. The increasing ...
