

Photovoltaic panels on the roof of an Estonian factory

Overview

What is Solarstone doing in Estonia?

Solarstone is reinforcing Estonia's commitment to sustainable energy solutions by opening Europe's largest solar roof factory to produce 14 times as many building-integrated solar roofs as Tesla in the U.S. The factory can assemble 13,000 integrated solar panels per month.

Does Solarstone have a BIPV factory?

Solarstone launched a BIPV factory in Viljandi, Estonia. Solarstone unveils its state-of-the-art Building-Integrated Photovoltaics (BIPV) factory in Estonia with an annual output of 60 MW. The factory has the capacity to assemble 13,000 integrated solar panels per month.

What are building-integrated photovoltaics (BIPV)?

These materials are called building-integrated photovoltaics (BIPV). Unlike traditional solar panels, Solarstone products do not need a conventional roof underneath. Seven years later, Solarstone's production has grown from tailor-made roofs to mass production of about a thousand roofs per year.

How much does a roof cost in Estonia?

Eastland said roofing material he was able to source in Estonia came in at around 60 percent less than originally budgeted four (though still coming in at £118,000, or nearly €138,000).

How many solar panels can a BIPV factory produce?

Estonian BIPV specialist Solarstone said this week that it has built a new 60 MW factory in Viljandi, Estonia. The site has the capacity to assemble 13,000 integrated solar panels per month, according to the company, enabling the supply of 6,000 homes with 10 kW solar roofs.

Does Tesla have a solar roof?

In the last seven years, Tesla has installed solar roofs for 3,000 homes in the U.S. According to the CEO of Solarstone, Silver Aednik, the new factory helps to drive the industry transformation globally. The plant's annual production capacity of 60 MW bolsters Solarstone as the leading building-integrated photovoltaics production unit in Europe.
