

Photovoltaic power generation from solar panels in Estonia

Overview

Estonia's renewable energy sector reached a significant milestone in 2024 with €244 million in investments from the EBRD, focused on solar and wind power projects. A key development, the 45 MW KC Pihlaka Solar Park, will generate over 41,000 MWh annually.

Photovoltaic power generation from solar panels in Estonia

[Estonia to expand solar-power production with EUR62 million EIB, ...](#)

244 MW solar park in Risti in western Estonia to be largest photovoltaic-production (PV) site in the Baltics. Project marks significant step towards Baltic energy independence ...

[Estonia is rising to the top in solar energy production with ...](#)

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and ...

[Solar PV Generation and Consumption Dataset of an Estonian ...](#)

The dataset presented in this study contains one year (2023) of photovoltaic (PV) generation and energy meter power flow data collected at ten-second intervals from a residential dwelling in ...
