

Photovoltaic solar panels made in Côte d'Ivoire

Overview

How many solar plants will Côte d'Ivoire build?

The Republic of Côte d'Ivoire is planning to build 12 photovoltaic solar plants with a combined capacity of 678 MW in different parts of the country by 2030. Likewise, the government plans to reach 1,686 MW by 2040.

Which companies are developing solar power plants in Ivory Coast?

The Egyptian company Elsewedy Electric is also among the potential developers of the Laboa and Toubia solar plants. The same goes for Infinity Power Holding and Nareva Holding, the subsidiary of the Moroccan group Al Mada. The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast.

How many solar plants will Ivory Coast have by 2040?

Likewise, the government plans to reach 1,686 MW by 2040. The Minister of Mines, Oil, and Energy of the Ivory Coast, Mamadou Sangafowa Coulibaly, has declared plans to add 678 MW of solar capacity by 2030 and 1,686 MW by 2040. Plans for the 12 new solar plants with a combined capacity of 628 MWp are listed on the government website.

When will a solar power plant open in Côte d'Ivoire?

In the northern region of the Côte d'Ivoire, the first phase of a solar power facility has been officially opened. The Boundiali solar power plant's financing was initially revealed in 2018, and details of its commissioning were made public in December 2022.

What's going on at a solar plant in France?

The 37.5 MW plant — which is being described as the nation's first significant solar array — will supply electricity to Compagnie Ivoirienne d'Electricité, the nation's utility. At the solar plant, the second phase of work has begun and is anticipated to be finished by April 2025.

What is the goal of the Ivorian energy project?

The goal for the Ivorian State is to achieve a share of so-called clean energies estimated at 45% in the national energy mix by 2030, compared to 30% today. Finally, this project will eventually prevent more than 70,000 tons per year of carbon dioxide emissions, thereby improving the country's carbon footprint.
