[Sign up here.](#) Current installed new energy storage capacity, which is made up mostly of lithium-ion battery storage, was 95 GW as of June, the regulator, the National Energy Administration, said in August. China has raced ahead of its energy storage targets in the past.

What are the leading energy storage battery companies in China?

Leading energy storage battery companies in China include BYD (002594.SZ), which is also the country's biggest electric vehicle maker, and CATL (300750.SZ).

How much battery storage will the US have in 2025?

It initially set its new energy storage target for 2025 at 30 GW but reached that milestone two years early. By comparison, the U.S. had 26 GW of utility-scale battery storage at the end of 2024, and its planned capacity would bring that to just over 46 GW by the end of 2025, according to the U.S. Energy Information Administration.

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems, but not pumped hydro, which uses water stored behind dams to generate electricity when needed. Our Standards: The Thomson Reuters Trust
