

Poland Energy Storage Station Project

Overview

What is the most advanced energy storage project in Poland?

The most advanced energy storage project in the PGE Group's portfolio is the Żarnowiec Energy Storage Facility. With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe.

What is the largest battery energy storage facility in Poland?

With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe. The contractor on the project will be LG Energy Solution Wrocław.

Will Poland become a hotbed of energy storage project development?

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to industry body WindEurope, bringing its total installed capacity to around 9.4 GW.

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

Will EDF renewables build a second battery energy storage facility in Poland?

EDF Renewables has completed the acquisition of a second battery energy storage project in Poland, with a capacity of 120 MW, increasing its total storage capacity in the country to 170 MW. Construction of the new facility will

start in late 2025, with commissioning set for early 2028.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

[illegible]

What's Next for Polish Energy Storage? The government's draft Energy Policy 2040 calls for 6 GW of installed storage capacity - enough to power 4 million homes for 4 hours [6]. Emerging ...
