

Power storage installed capacity statistics

Overview

How many GW of energy storage installations are there in 2024?

HOUSTON/WASHINGTON, D.C., March 19, 2025 — The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood Mackenzie.

Which states have the most grid-scale storage installations in 2025?

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage deployment beyond the leading markets. Grid-scale storage installations are forecasted to reach 13.3 GW in 2025.

What is renewable power generation capacity?

Renewable power generation capacity is measured as the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce electricity. For most countries and technologies, the data reflects the capacity installed and connected at the end of the calendar year.

What types of energy storage are included?

Other storage includes compressed air energy storage, flywheel and thermal storage. Hydrogen electrolyzers are not included. Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

How many MW of storage was installed in 2024?

145 MW of community-scale, commercial and industrial (CCI) storage was installed in 2024, a 22% increase over the previous year. California, Massachusetts, and New York accounted for 88% of installed CCI capacity.

Forecasted installations for 2025 have increased 7% over last quarter's forecast.

Is energy storage the future of energy security & grid reliability?

"After another year of record deployment, energy storage is solidifying its place as a leading solution for strengthening American energy security and grid reliability in a time of historic rising demand for electricity," said ACP VP of Energy Storage Noah Roberts.

Power storage installed capacity statistics

[Electricity installed capacity, by source. Data by Countries from ...](#)

Capacity data consist of both utility and non-utility sources. Official statistics by year of electricity installed capacity, by source (GW). The values are presented in tables and charts with ...

Analysis on Recent Installed Capacity of Major Overseas Energy Storage

By examining prominent energy storage markets overseas, such as the United States and Europe, it becomes evident that three pivotal factors are propelling the rapid surge ...

[Solar, battery storage to lead new U.S. generating capacity ...](#)

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

[Electricity explained Energy storage for electricity generation](#)

Energy storage for electricity generation An energy storage system (ESS) for electricity generation uses electricity (or some other energy

source, such as solar-thermal energy) to charge an ...
