

Price of EDF energy storage equipment

Overview

How much does a battery cost at EDF?

Below is a breakdown of battery prices available from EDF, starting at just £2,495. Batteries are a great way to save on your energy bills. But why not take advantage of a solar tariff and maximise your savings even more?

.

Can I purchase a battery storage solution through EDF?

Through EDF you have the opportunity to purchase a battery storage solution for your home. Sunsynk makes rechargeable batteries for homes and electric cars. The batteries are compatible with all grid-connected solar panels to store the energy the panel's capture.

Why is the EDF Group investing in battery storage?

The EDF Group are investing in battery storage - \$10 billion by 2035 - to help support a more sustainable energy future. It's important to this as an energy company so we can make sure our electricity systems can support new technology and renewable sources of energy. Read more about our plans in this article from Green Tech Media.

Who benefits from EDF power solutions?

EDF power solutions delivers storage on both the distributed and utility scale. It's not just commercial solar shoppers who benefit from installing energy storage.

How can storage help reduce energy costs?

In addition to lowering operational energy costs, storage can help control and forecast long-term energy budgets and increase energy reliability. There are several options when it comes to adding storage – direct purchase, power purchase agreement, shared savings or power purchase agreement with

shared savings.
