

Price of home solar integrated machine in Spain

Overview

As of 2024, the average cost of solar panels in Spain ranges between €1,000 to €2,500 per installed kilowatt (kW). This means that for a typical home system of around 5 kW, you could expect to pay between €5,000 to €12,500 before any government incentives. How much do solar panels cost in Spain?

This will be determined by several factors, not least if you go for an on-grid or off-grid installation. You should expect the lowest priced off-grid installation to cost around 5,000 euros for solar panels in Spain. This kind of system would be suitable for a small home with between two and three bedrooms.

Should you install solar panels in Spain?

This is especially true given that the cost-of-living crisis means that energy bills are higher than ever in Spain, so having your own cost-effective energy source attached to your home might be an added incentive to take the plunge and research solar panels in Spain. How much will they cost?

What are the pros and cons of installing them?

.

How much does a solar self-consumption photovoltaic installation cost in Spain?

The price of a solar self-consumption photovoltaic installation for a single-family home is around €1,500 for each kilowatt generated (taxes not included). If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT).

Which solar panels are available in Spain?

Our company provides kits with JA Solar and LG panels, but we can also select another manufacturer upon request. In Spain, the most popular solar panels are from these manufacturers: LG, JA Solar, Canadian Solar, Trina Solar, LONGi

Solar, and Tongwei Solar. These companies offer high-quality products with excellent performance and warranty.

How much does a solar panel cost?

The possibilities are endless as is the case with the solar panels, inverters, depending mainly on whether they are connected to the grid or isolated from it. For normal power a home, between 3.5 kW and 5.5 kW, prices vary between 1,500 and 3,000 euros.

What is the best orientation for solar panels in Spain?

The best orientation for Spain to capture most of the Sun's energy along the day is South. Each plot in Spain has a different urban planning regulation that indicates the architectural design rules to follow. Sometimes this means that you're not able to have a flat roof or even that your solar panels cannot be seen from the street.
