

Purchase of lead-acid battery cabinets

Overview

Can you buy battery acid for lead acid batteries?

Individuals wishing to buy battery acid for lead acid batteries will no longer be able to legally do so unless they apply for and are granted an EPP Licence (Explosives Precursors and Poisons), as battery acid, or electrolyte, contains more than 15% sulphuric acid.

What is a lead acid battery container?

Lead Acid Battery Container - for safe battery storage and transportation. The Battery Transport & Storage (BTS) Container was purposely designed as a lead acid battery container, for the regulation compliant, safe and environmentally responsible storage and transportation of used lead acid batteries.

Why is a sealed battery a good choice?

Sealed batteries do not allow for water to be added to the electrolyte, therefore the evaporation of the water contained in the electrolyte, due for example to high room temperatures or internal heating as a result of charging/discharging cycles, decreases their lifetime. - Designed to satisfy and respect safety protection standards.
