

Romania PV module prices

Overview

Prices of the 26 winning solar bids ranged from €35.50 (\$41.59)/MWh to €45.20/MWh. Romania is on track for record solar deployment in 2025, driven by subsidies for residential and commercial and industrial systems and a more favorable framework for utility-scale development. What is the monitor of Romanian photovoltaic projects?

The Monitor of Romanian Photovoltaic Projects is a tool offering thorough summaries of large-scale PV projects happening all over the country. However, there are some issues that need to be carefully thought through because they could have an effect on many different groups of people.

How many largescale photovoltaic projects are there in Romania?

Here are some considerations based on this research. Romania has made significant strides in developing large-scale photovoltaic (PV) projects, contributing to its renewable energy goals. As of the latest data available, there are over 880 large-scale PV projects in Romania, boasting a cumulative capacity of approximately 46,600 MW.

What is the landscape of largescale PV projects in Romania?

The landscape of large-scale PV projects in Romania encompasses a wide range of installed capacities, catering to diverse energy needs and project objectives. By categorizing these projects based on their installed capacity, we gain insights into the scale and scope of solar energy deployment in the country.

Can a prosumer install a solar system in Romania?

Romania's parliament has adopted a bill mandating prosumers with PV systems with capacities from 10.8 kW to 400 kW to install energy storage systems. OMV Petrom, a majority-owned Romanian oil and gas supplier, has purchased a 50% stake in three solar projects in Romania.

Who owns Romania's first floating solar project?

OMV Petrom, a majority-owned Romanian oil and gas supplier, has purchased a 50% stake in three solar projects in Romania. Romanian energy company TMK Hydroenergy Power has switched on the country's first floating solar project. The facility, located on a pond in Caras Severin county, is connected to a hydropower plant.

Where can solar energy be developed in Romania?

Arad (5.40 GW) and Dolj (5.39 GW) are the most promising locations, but counties such as Giurgiu (4), Bihor (3.8), Teleorman (2.6), Timis (2.3) and Dambovita (2.3) also stand out in this respect. This geographical diversity highlights the potential for solar energy development across Romania.
