

Romania energy storage battery order

Overview

An affiliated company Nova Power and Gas, part of the E-Infra group controlled by Romanian businessman Teofil Mureşan, is about to obtain a founding authorization to install the largest electricity storage battery in Romania at this time. Will Romania reopen a call to support battery storage projects?

Romania's Ministry of Energy has reopened its call to support projects of battery storage for renewable energy integration, seeking at least 240 MW and 480 MWh of resources. The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports.

Will Romania re-launch a battery energy storage tender?

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the production of energy storage equipment and solar panels.

How much does Romania spend on battery energy storage in 2026?

Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of batteries and solar cells and panels. With this reopened bidding, the ministry aims to see the two-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. The budget for the BESS projects is EUR 79.6 million.

Why should Romania Invest in energy storage batteries and photovoltaics?

If Romania can gain an advantage in the energy storage battery and photovoltaic industry and attract industrial capital from inside and outside the EU to invest in this field, it will help the EU to realise an autonomous and controllable sustainable energy supply chain.

Can you build a house on extra muros in Romania?

As a general rule, performing construction works on land located outside the city — known as extra muros — is prohibited in Romania, even for agricultural land. To build on such land, it must first be reclassified as intra muros through a PUZ, a prerequisite for obtaining a building permit.

How many MWh will Romania have in 2023?

The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports. Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of batteries and solar cells and panels.

Romania energy storage battery order

[ROMANIA: Romania starts 2025 with a total capacity of 137 MW ...](#)

The data of the transmission and system operator show that, on January 1, 2025, 13 battery storage groups are operational in Romania, which have a total installed power of 137.2 ...

[Romania reopens two investment tenders for projects related to energy](#)

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the ...

[Claritas secures CfDs in Romania and advances battery storage ...](#)

18 hours ago · Claritas Investments is expanding renewable energy activities in Central and Eastern Europe, with progress across both the Romanian solar photovoltaic market and the ...

[ROMANIA: Romania starts 2025 with a total capacity of 137 MW in energy](#)

The data of the transmission and system operator show that, on January 1, 2025, 13 battery storage groups are operational in
