

Samoa s official photovoltaic panel power generation manufacturer

Overview

Greenpower Samoa is a leading renewable energy company in the South Pacific, dedicated to advancing sustainable energy solutions. We specialize in the investment, development, and construction of solar photovoltaic (PV) power stations for residential, commercial, and large-scale applications. Does Samoa have a solar grid?

Samoa's first grid connected solar. Samoa, the first country to access the Pacific Environment Community (PEC) Fund since its inception in 2010 is finally having their first solar photovoltaic grid system commissioned for use in Salelologa, Savai'i.

How will Samoa's 546kwp solar PV system benefit the government?

The installation of Samoa's 546kWp solar PV grid-connected system is expected to provide significant benefits to the government of Samoa by reducing the use of diesel by around 190,000 litres p.a and realizing costs savings of approximately SAT570,000 per annum in a country which generates 60% of its electricity from diesel.

How long will Samoa's solar project last?

The project expected to last more than 20 years is spread out over three sites in the country's main islands, Upolu and Savai'i. "Today, we are opening Samoa's first solar system, without storage, that can be connected to the grid, to run in parallel with other energy sources like diesel generators.

What has the EPC done for Samoa?

To date, works continue for further developments of its existing generation and distribution network. As mandated to generate, distribute and sell electricity supply to all of Samoa, the EPC has connected up to 99% of Samoa's population. Increased access by all people of Samoa, to quality and affordable electricity supply.
