

Senegal 4 MW of solar energy

Overview

How many people in Senegal will get solar power?

Nearly 540,000 people in Senegal will get access to clean and affordable power following the launch of two solar photovoltaic (PV) plants, financed by IFC, the European Investment Bank and Proparco, under the World Bank Group's Scaling Solar program.

Can Senegal develop 60 megawatts of solar power?

The government of Senegal has been working with the World Bank Group to develop 60 megawatts of solar power through Scaling Solar. According to World Bank data, over 70% of the population of Senegal currently has access to electricity.

How much electricity does Senegal have?

As it stands, 70.4% of the Senegalese population has access to electricity, of which less than a third is generated from domestic sources – total installed capacity currently sits at 1,555 MW. However, under the government-backed World Bank Scaling Solar program, 60 MW was added to Senegal's domestic power generation last year alone through solar.

Does Senegal need a solar power plant?

Senegal's power sector has been historically reliant on costly fuel imports, with about 80 percent of its energy mix being oil-based. "The Kael and Kahone solar power plants exemplify our commitment to supporting Senegal's transition to cleaner, more affordable energy, while creating business opportunities for local communities.

How much does a solar power plant cost in Senegal?

The paired solar power plants cost \$40.77 million, providing electricity to 540,000 people at under four cents per kWh – not only the cheapest energy in Senegal but among the most cost-effective across sub-Saharan Africa.

Will two solar plants be built in Senegal's southern Casamance region?

DAKAR, Nov 13 (Reuters) - Two solar plants with a combined 60 megawatts (MW) capacity and battery storage will be built in Senegal's southern Casamance region to electrify rural areas, Africa-based project developer Axian Energy said on Wednesday.
