

Serbia s largest solar panel factory

Overview

Serbia's inaugural solar panel manufacturing facility, operated by 'Domi Eko Solar', with an annual output capacity exceeding 100 megawatts, has started its operations in Velika Plana. What is the largest solar power plant in Serbia?

"The DeLasol solar power plant is the largest PV facility in Serbia and an example of how by using solar energy we can simultaneously improve the security of electricity supply and environmental protection," said Energy Minister Dubravka Đedović. The facility has a capacity of 9.9 MW and occupies an area of 12.5 hectares.

How much solar will Serbia have by 2024?

Serbia is currently targeting to deploy 8.3 GW of PV by 2024, according to a new plan recently drafted by the government. Utility-scale PV projects could be built on 200,000 hectares of neglected, low-value agricultural land that could host 2 GW of solar, according to the draft.

How much does ProCredit banka Srbija pay for a solar project?

ProCredit Banka Srbija agreed to finance the project with €9 million (\$9.8 million). The lender had previously financed two solar projects built by MT-Komex in Kladovo. Serbia is currently targeting to deploy 8.3 GW of PV by 2024, according to a new plan recently drafted by the government.
