

Serbian solar integrated machine

Overview

Can Serbia build a solar power plant?

The Government of Serbia has signed an agreement with the Hyundai Engineering-UGT Renewables consortium on building solar power plants with a total connection capacity of 1,000 MW (1,200 MW in nameplate capacity), along with battery systems for electricity storage of up to 200 MW/400 MWh. The signing will be followed by talks on financing terms.

How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

What is Serbia solar PV?

The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase. Articles, videos and more about our projects in Serbia.

What is UGT renewables Serbia solar?

UGT Renewables Serbia Solar is a ground-mounted solar project, which is planned over 2,000 hectares. The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.
