

Seychelles mobile power station power generation

Overview

The power station was commissioned in 2015 with an installed generation capacity of 58 MW. In October 2023, a 33kV underground transmission network project funded with \$30.9 million by the and was commissioned. It involved setting up the network, starting from the power station and extending along the east coast of Mahé, from Providence to Turtle Bay. It also extends to Anse Boileau thr.

The power generators in place mainly use imported HFO (Heavy Fuel Oil) and are nearing the end of their lifespan. Largely due to ageing generators in use, out of 129 MW installed power generation capacity, actual generation capacity is only 66 MW (52%).

Seychelles mobile power station power generation

[PUC to expand power generation capacity on Mahé -Seychelles ...](#)

To meet the growing electricity demand and improve reliability on Mahé, the Public Utilities Corporation is expanding the generation capacity of its Roche Caiman power station.

[Renewable Energy - Ministry of Agriculture, Climate Change and ...](#)

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at ...

Roche Caiman Power Station

The power station was commissioned in 2015 with an installed generation capacity of 58 MW. In October 2023, a 33kV underground transmission network project funded with \$30.9 million by the Saudi Fund for Development and Arab Bank for Economic Development in Africa was commissioned. It involved setting up the network, starting from the power station and extending along the east coast of Mahé, from Providence to Turtle Bay. It also extends to Anse Boileau thr...
