

Shopping mall power generation station

Overview

Why do shopping malls need backup power generators?

Without electricity, retailers cannot trade. So, the overarching reason shopping malls need backup power generators is to provide tenants with a reliable source of electricity. With unplanned power outages and load shedding still impacting retail outlets across South Africa, having a backup power generator means business continuity; come what may.

What is a power center mall?

Power centers are large strip malls. This is a marketplace, public square, or similar open space. It may include streets closed off to vehicular traffic. A mall in which manufacturers sell their wares directly to the public, usually at discount prices. How Much Does It Cost to Build a Mall?

It's not cheap to build a mall.

What's new at Power Plant Mall?

Power Plant Mall, Arton Strip, and The Grove have implemented new safety measures. Elevators will be equipped with anti-bacterial diffusers and will only allow four passengers at a time. Escalators have UV handrail sanitisers. The new restroom protocol allows for only four people at a time inside. All cubicles, countertops, and sinks will be disinfected after every use.

What happens if power goes off at a mall?

Lighting, elevators, access control, and other mall infrastructure go down when the power cuts off. This means it becomes impossible for shoppers to navigate the centre, unless there's a backup power generator keeping this infrastructure working and the mall open to the public.

Why do malls need backup power?

Backup power means a mall can communicate to customers that they are

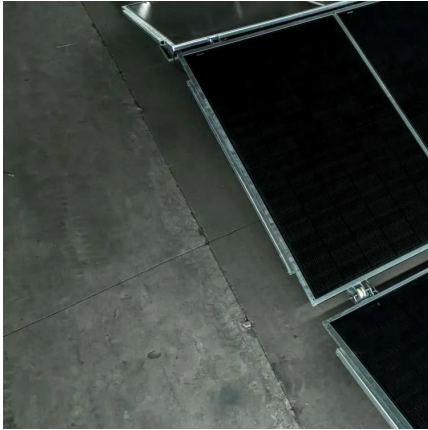

open and operational during outages. Air conditioning is such a relief for shoppers when visiting their favourite malls. When the power goes out, these aircons can't keep cooling stores and common areas down.

Should a mall shut its doors during a power outage?

Whether a mall has to shut its doors during a power outage or not, being able to communicate with customers is pretty important. Backup power means a mall can communicate to customers that they are open and operational during outages. Air conditioning is such a relief for shoppers when visiting their favourite malls.
