

Slovenia PV DC combiner box

Overview

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

What is a Weidmüller DC combiner box?

Weidmüller's DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well as string monitoring solutions (I,V, T, and SPD and switch isolator status) for PV systems using central inverters with PV panels in trackers and fix tilt systems.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met.

Why should you buy a DC combination box from Phoenix Contact?

The DC Combiner Boxes from Phoenix Contact satisfy this demand and also feature a space-saving housing. Our monitoring system for photovoltaic strings enables you to respond immediately to malfunctions and power losses, even when individual strings fail.

What is a DC combination box?

In addition, the DC Combiner Box monitors the system performance and protects the individual modules against damage from overvoltage. Specialists who design and build photovoltaic systems face the challenge of achieving maximum availability and performance of photovoltaic systems.

What is a string combiner box?

The string combiner boxes form subsystems that can be standardized according to the number of strings, voltage and rated current. ABB offers different product ranges, each dedicated to specific installation conditions with typical configurations. Main benefits Main Features Are you looking for support or purchase information?
