

Solar home energy storage battery prices

Overview

Thinking about adding a battery to your solar panel system?

Learn what you can expect to pay and find out if the benefits outweigh the cost.

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+.

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. That's one reason why the majority of residential solar panel systems in the.

Solar batteries have become increasingly popular. However, it can be hard to know if a solar battery is right for you, so we put together some guidelines to help you know where you stand. Solar storage may be worth it for you if: 1. You have high electricity costs.

If you're planning to purchase one or more solar batteries, there are a few ways to save money on your purchase further down the road.

A solar battery costs \$8,000 to \$16,000 installed on average before tax credits. Solar battery prices are \$6,000 to \$13,000+ for the unit alone, depending on the capacity, type, and brand. How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does home battery storage cost?

Installing home battery storage typically costs between \$6,000 and \$18,000, according to live pricing from solar.com's installation network. Why such a

wide range?

The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store. Battery systems can range from 5 to 40 kWh, depending on your energy needs.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security — even if they're not worth it financially.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. *The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

How much does a solar battery backup cost?

Two cabinets can connect to a single inverter for up to 36 kWh total backup power. Whole-house solar battery backup costs \$20,000 to \$32,000 installed, not including solar panels. The average home uses 28 to 30 kWh per day, requiring batteries with at least that total capacity or more to power the entire home for one day.
