

Solar integrated tile cost price

Overview

What is the cost of solar roof tiles?

Solar roof tiles typically cost up to three times as much as solar panels. For a 3KW system, you could be looking at up to £10,000 to £12,000. The Energy Saving Trust estimates that solar roof tiles can earn a homeowner around £7250 in FIT payments over 25 years, so you could have a long wait to recoup your costs.

What are solar tile roofs?

Solar tile roofs are roof shingles with built-in photovoltaic cells. SunTegra is one of the leading providers of these solar roof tiles in the US, and their products can easily integrate with both asphalt shingle and concrete tile roofs.

What are solar shingles and tiles?

Solar shingles and tiles are roof components with built-in photovoltaic cells. Unlike traditional PV installations, they become part of the roof itself, eliminating the need for separate components.

Can SunTegra solar tiles be installed on a concrete roof?

SunTegra Solar Tiles can be installed on concrete roofs*. They can be used in a new construction project, or to upgrade an existing concrete roof without having to replace all the tiles.*.

Are solar roof shingles a good option?

Solar roof shingles can be a good option for homeowners who don't like the appearance of conventional solar panels. Unlike traditional PV installations where panels are mounted on top of the roof, solar shingles and tiles become part of the roof itself.

How much do SunTegra solar shingles cost per watt?

SunTegra solar shingles cost between \$4.65 and \$5.60 per watt (estimated). For comparison, traditional solar panel systems normally cost around \$3.06 per watt before incentives. SunTegra has a cost advantage over competing products, which means you can get a quicker payback period and a higher ROI.
