

Solar system customization

Overview

How do I create a solar system?

This interactive online solar system creator allows you to dream up planets, moons, sun, and more. To create your solar system, use the “Add” button at the top to add new planets. Change the characteristics of each planet by using the buttons below the solar system model.

How do I add a planet to my solar system?

Instructions: Set the star's temperature. Use the Choose Planet tab to insert up to 20 planets into your solar system. You can choose the type (small, Earth-sized, super-Earth, Jupiter, and Bigger sizes), but the color, rings, and moons of the planet will be completely randomized (though they can later be changed.).

How do I create a randomized Solar System?

There are two parts to this tool. The first, seen directly below, is the randomizing version. Simply click the 'Randomize solar system' button, and it'll automatically generate a randomized solar system. Click any of the planets in it, and you'll be presented with basic information in the fields below the button.

How do you delete a solar system?

Exit and return to the solar system by clicking “Center Sun.” Delete a single planet using the “Delete” button. Erase the entire solar system model using the trash can button at the top. To see the solar system in action, press the “Play” button at the top. Return to creator mode by pressing “Stop.”.

How do you remove a planet from a solar system?

Instructions : Drag and drop new planets around the Sun. Drag them to re-position, or drop them to the right side to remove. What is a Solar System?

A solar system comprises of a star and all the celestial bodies that travel around it - planets, moons, asteroids, comets. Some solar systems may even have two stars. What is a Star?
