

# South Korea PV 24MWh Energy Storage Project

## Overview

---

Where in South Korea is a solar PV project located?

Located in a 2.96 million square meters mountainous site in Daemyeong, Yeongam, about 340 km south of Seoul, the PV project is a part of the South Korean largest hybrid energy system integrating PV, wind and energy storage, featuring agility within a complicated landform and high humidity environment.

Where is the largest solar project in South Korea?

The project, recently put into commercial operation, is in Yeongam, South Jeolla province, South Korea. It is noteworthy as one out of the only two solar projects of approximate 100 MW capacity in the country, and milestone application as of the largest hybrid energy systems in the region. Part of the Largest PV+Wind+Storage Complex in South Korea.

Does South Korea have a battery industry?

But South Korea's battery industry faces mounting pressure from China, whose manufacturers, led by CATL, currently account for nearly 90 percent of global energy storage battery capacity. CATL expanded its footprint in January by establishing a South Korean subsidiary, signaling an aggressive push into the local market.

What is South Korea's Green Energy Plan?

The initiative is closely tied to South Korea's 11th Basic Plan for Electricity Supply and Demand, which outlines an aggressive ramp-up in renewables. The plan aims to boost the share of green energy from 8.4 percent of the national energy mix in 2023 to 29.2 percent by 2038.
