

# **South Sudan s largest energy storage project**

## Overview

---

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes. Does South Sudan have a large-scale solar power project?

South Sudan has taken a significant step toward renewable energy with the launch of its first large-scale solar power project. The Ezra Group, a prominent business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant, complemented by a 14-megawatt-hour (MWh) Battery Energy Storage System (BESS).

Why should South Sudan invest in solar power & battery storage?

This project marks a significant achievement for South Sudan, reinforcing its commitment to renewable energy and environmental responsibility. By investing in solar power and battery storage technology, the country is making a decisive move toward energy independence, economic growth, and a sustainable future for its people.

Does South Sudan have a solar-plus-battery storage project?

Key Figures & Findings: South Sudan is embarking on a significant renewable energy transformation, with a new solar-plus-battery storage (BESS) project to address the country's alarmingly low energy access.

Does South Sudan need a new solar power plant?

The new solar plant now accounts for 19% of JEDCO's total electricity distribution, complementing existing thermal power plants. However, the long-term success of renewable energy in South Sudan will require additional sources of clean energy.

Why is South Sudan's solar-Bess project important?

With only 7% of the population currently connected to the grid, this project is

crucial to delivering sustainable and affordable energy solutions to millions. Insights: South Sudan's solar-BESS project is designed to address its status as one of the least electrified countries globally.

Why is South Sudan struggling to provide electricity to its citizens?

According to a 2024 sciencedirect.com report, South Sudan struggles to provide its citizens access to electricity despite having abundant energy resources, particularly fossil fuels.
