

Specialized energy storage battery companies in Cyprus

Overview

Leading brands like Tesla Powerwall, BYD, and LG Chem maintain authorized service centers in Nicosia and Limassol, ensuring immediate support when needed. These batteries thrive in Cyprus conditions, operating optimally between 15-35°C – exactly what your shaded garage provides year-round. Could a battery-based electricity storage system be developed in Cyprus?

Also read X Major global companies like Tesla and Samsung have expressed interest in developing a battery-based electricity storage system in Cyprus, according to Minister of Energy, Trade, and Industry George Papanastasiou.

How many battery energy storage systems will be installed at key substations?

Three utility-scale battery energy storage systems (BESS) will be installed at key substations: All systems must be fully installed and connected to the grid by June 2026.

Can Cyprus become an energy hub?

The strategy is built on three pillars aimed at transforming Cyprus into an energy hub. The first pillar is the rapid establishment of a liquefied natural gas (LNG) import terminal for power generation.

When will commercial energy storage systems be fully installed & connected?

All systems must be fully installed and connected to the grid by June 2026. Although TSOC retains ownership and operational control, CERA has stipulated that private storage operators will receive priority for grid services, preserving space in the market for commercial energy storage initiatives.
