

Swedish outdoor inverter

Overview

Can inverters be installed outside?

As a rule, inverters designed for outdoor use may be installed either outdoors or indoors, however indoor inverters can only be installed indoors. The great majority of grid-tied or string inverters available today are designed for outdoor installation.

How to choose a site for installing an inverter?

When choosing the site for installing an inverter, it is essential that the environmental conditions specified by the manufacturer be maintained. There are both temperature and humidity requirements for these devices.

Should inverters be shaded?

Thus, even inverters that incorporate robust outdoor packaging should be kept shaded, even if it means installing an awning over them. The ideal installation site for inverters is cool, dry, dust-free and indoors.

What are the different types of inverters available?

It is available in sizes 1.5KW 1kW and 2kW 3kW at the 1-phase embodiment and the sizes 5kW, 8kW, 10kW, 15kW and 20kW three-phase embodiment. We have designed the inverter in a way that makes it easy to place, simple and stylish. Subtle color and a good display with only Those features that we think are needed on an inverter.

Can a grid-tied inverter be installed outside?

Like most electronic devices, inverters operate more efficiently at cooler temperatures. While most grid-tied inverters are designed for outside installation, they should not be mounted in direct sunlight, as this will degrade their efficiency. In addition to the lost output, the lifetime of the unit is likely to be shortened.
