

Swiss frame container wholesale

Overview

What is a steel container frame?

Container Structure The steel container frames consist of welded steel profiles with reinforced container corners. A fully galvanized frame, along with roof and floor supports, significantly enhances durability and serves as the basis for necessary stability. Additionally, for secure transport with heavy equipment, there are forklift pockets.

What is the standard size of a container frame?

The container frames are manufactured to the ISO standard size of length 6,058 mm x width 2,438 mm x height 2,800 mm, ensuring maximum compatibility with other modules in further expansion. Upon request, the frames are also available in the standard width of 3 meters. A verifiable static type forms the central basis for further expansion planning.

What are the different types of eco-friendly wholesale containers?

Here is a closer look at the different types of eco-friendly wholesale containers available. Our tin containers are 100% recyclable and are built strong with sleek designs. Tin wholesale containers with lids have the advantage of being more resilient than plastic and paper cartons and more shatter-resistant than glass.

Why should you choose a wholesale container packaging company?

Some of the wholesale containers are made with either recyclable plastic, biodegradable materials, or tin. Regardless of which type of container packaging you choose, your brand will contribute to the overall efforts to lower carbon emissions, decrease plastic pollution, and increase sustainability.
