

The base station can't provide power

Overview

Why is my base station not turning on?

Hi, If the base station is not turning on when power is connected to either the DC-In jack or the mini USB port then there is a problem with the power supply circuit on the motherboard.

Why is my ring base station not working?

If your Ring Base Station is stuck or not working, try these simple troubleshooting methods: Turn it off and on again by rebooting your Base Station. You can do this by briefly tapping the reset button on the back of your Base Station. Don't hold it down, or it will factory reset it, though! It might be a connectivity issue.

Why does my phone keep coming up base no power?

The handset may have become deregistered from the base station. To fix this, place the problem handset onto the main base station. It should then automatically register. Let me know if that works?

I did that already and it still comes up base no power.

How do I know if my base station is armed?

If there's a red light on the top of your Base Station, that clearly indicates that your system is armed if you're in Home or Away mode. However, some users confuse the central "Ring of Light", the usually solid blue ring at the Base Station's top side, as being able to tell the power status of their Base Station. However, don't make this mistake.

How do I fix a broken base station?

Don't hold the button down. If that doesn't work, power cycle the Base Station. Here's how to do it: Unplug it. Open the battery compartment. Take out the battery. Keep everything unplugged and removed for about 30

seconds or more. Plug in the Base Station. Reinsert the battery.

Why is my base station led off?

LED Off: The Base Station is in low-power mode. And for easy reference, here's a breakdown of other essential light patterns to keep an eye on: Ring of Light Patterns: Solid Blue Ring: Everything's working fine. Flashing Blue Full Circle: Pairing is in progress. 4 LEDs Flashing Blue Five Times: Pairing error.
