

The world s first solar panel

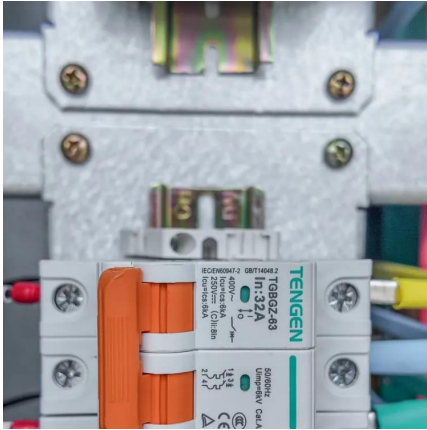

Overview

- 2003 - George Bush has a 9 kW PV system and a solar thermal systems installed on grounds keeping building at the White House
- 2004 - California Governor Arnold Schwarzenegger proposed Solar Roofs Initiative for one million solar roofs in California by 2017.

In 1883, Charles Fritts made history by installing the first solar panels on a New York City rooftop. He used selenium coated with gold to create the first solar cell. This cell produced electricity with a conversion rate of 1 to 2 percent.

The world's first solar panel

The Pioneer of Solar Energy: Charles Fritts and the Birth of Solar Panels

Using selenium, a non-metal element known for its photoconductive properties, Fritts created the world's first solar cell. He coated selenium wafers with a thin layer of gold to ...

[Solar history: Timeline & invention of solar panels](#)

In 1973, the University of Delaware was responsible for constructing the first solar building, named "Solar One." The system ran on a hybrid supply of solar thermal and solar PV ...

Timeline of solar cells

Overview2000-20191800s1900-19291930-19591960-19791980-19992020s
