

Togo 5G communication base station wind power project

Overview

Does TOGOCOM have a 5G network?

TOGOCOM now offers a 5G network and has activated its commercial 5G network, providing clients with a very-high-speed mobile connection. The 5G network, made possible by partners Nokia, is now fully operational in Lome. 5G is a major tech disruptor for Togo.

Where will 5G be deployed in Africa?

Espoo, Finland – Nokia today announced that it has been selected by African mobile operator, Togocom in a three-year deal to deploy 5G across the country. In the capital city Lomé, the 5G network has just been launched -- the first time a 5G network has been deployed in West Africa.

How will Togo be impacted by 5G?

5G will bring significant disruption for the technological landscape in Togo and pave the way to greater opportunities for the Togolese entrepreneurial community. Togo is the first West-African country and third African state to deploy 5G technology.

What does 5G mean for Togo?

5G is a pillar of support for Togo's National Development Plan (NDP). A little over a year ago—November 6 2019—a commitment was made to make Togo a regional hub for digitalisation and technology as part of its National Development Plan (NDP) and a model for social and economic growth.

Is 5G a major tech disruptor for Togo?

5G is a major tech disruptor for Togo, offering much greater bandwidth availability, much higher data-transfer speeds—up to 100 times faster than 4G—and extremely lower latency. This will give Togo's corporate clients a new experience of technology and, in the long term, bring about newer, more innovative products and services for Togolese consumers.

Is Nokia a partner of togocom?

Nokia is a long-term partner of Togocom and has previously supplied equipment for their 3G and 4G networks. Togocom is the Togolese market leader in telecommunications serving the entire country.
