

Turkish lithium energy storage power production company

Overview

Newly founded company Progresiva applied for the installation and operation of an energy storage system at a site near Istanbul, the first of its kind in Turkey. Its parent Kontrolmatik has just started the construction of a lithium iron phosphate battery plant. What is Turkey's first lithium phosphate battery factory?

According to rules that came into force in October, such systems must have maximum operating power of at least 2 MW. Also this week, Kontrolmatik broke ground in Ankara for Turkey's first lithium iron phosphate battery factory. Minister of Industry and Technology Mustafa Varank said the project is worth USD 180 million.

Is kontrolmatik building a lithium iron phosphate battery plant?

Its parent Kontrolmatik has just started the construction of a lithium iron phosphate battery plant. The Energy Market Regulatory Authority (EMRA) received the first application for the installation and operation of an independent electricity storage unit in the form of batteries, Anadolu reported.

Who is Turkey's energy storage leader?

Shaping the Future of Energy Storage - Meet Turkey's Energy Storage Leader: Pomega! The company has meticulously designed its production processes to minimize environmental impact, adhering to the highest eco-efficiency standards.

Does Bulgaria have a battery-only power project?

The government prepared EUR 200 million in subsidies for battery storage units for this year. Bulgaria intends to direct most of the cash support from its National Recovery and Resilience Plan to solar power projects with battery storage. Home » News » Electricity » Turkey gets first battery-only power project, worth USD 250 million.

Why do we need a battery unit in Turkey?

They are convenient for immediate deployment in cases of demand spikes, drops in production and supply outages. The facility in Silivri would be the first detached battery unit in Turkey, as all other units and projects are integrated with power plants.
