

# **UAE smart energy storage battery customization**

## Overview

---

Are battery energy storage systems a viable solution?

Battery energy storage systems (BESS) are one viable solution. An advanced technological solution, they function by storing renewable energy which can then be used when power is required. They help address the challenge of intermittent renewable energy, and provide clean power 24 hours a day, no matter the weather conditions.

Why should you use a battery energy storage system?

Additionally, the system increases a facility's input power, making it especially beneficial for charging EVs. Our cutting-edge Battery Energy Storage Systems (BESS) offer reliable and efficient solutions ranging from 100 kW to 100 MW.

Is UAE a sustainable country?

For the UAE, renewable energy is a core pillar of its sustainability plans. Masdar, the UAE's clean energy powerhouse, is among the organizations supporting the country's efforts, both home and abroad. For instance, Masdar has committed to invest £1 billion (AED4.68 billion) in UK battery storage.

Why do you need a smart home energy system?

It protects electrical appliances from voltage surges and frequency fluctuations, making the entire system more robust. Additionally, it increases the available capacity, enabling you to connect more electrical devices to the system. Access your smart home energy system with our mobile solution.

Which states are investing in battery energy storage systems?

Other states in the US are also investing in battery energy storage systems with Texas and Arizona set to record the biggest growth, increasing the nation's battery output 10-fold to 16,000 megawatts. China is also spearheading the charge for BESS.

## UAE smart energy storage battery customization
