

Uzbekistan cold box equipment energy storage box manufacturer

Overview

What is a cold box?

Cold boxes are self-supporting structures that protect cryogenic equipment such as brazed plate-fin heat exchangers, core-in-drums, distillation columns, piping, valves and instrumentation. Our cold boxes' steel casing acts as an envelope that offers easy installation of plate-fin heat exchangers and other equipment.

How do cold boxes work?

They are fitted with a nitrogen purge system and contain stainless steel beams that support the enclosed equipment. Because our cold boxes are transported horizontally but operate in a vertical position, we also include temporary support material to protect the cryogenic equipment during transportation and throughout set-up.

How do Fives cold boxes protect cryogenic equipment?

Fives' cold boxes with integrated brazed heat exchangers protect cryogenic equipment in gas and petrochemical processing plants.

Uzbekistan cold box equipment energy storage box manufacturer

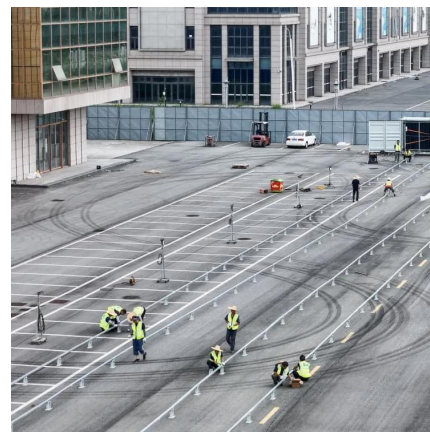

[Cold Box Manufacturer, Supplier and Exporter in Africa](#)

Specifications: Cold box, Large, long range for transport of vaccines. Vaccine storage capacity 20.25 litres. With lid and carrying handle. Supplied with one set of 0.4 litre icepacks. Cold life ...
