.

How is the Asia-Pacific solar photovoltaic market segmented?

The Asia-Pacific Solar Photovoltaic (PV) Market is segmented by product type, end-user, deployment, and geography. By product type, the market is segmented by thin film, multi-crystallinee silicon, and monocrystalline silicon. By end-user, the market is segmented into residential, commercial, and utility.

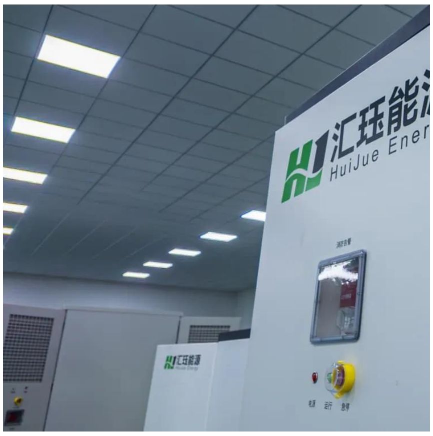
Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US$ using the US GDP deflator, to account for the effects of inflation.

Why are module prices stable?

Despite recent increases in upstream costs, module prices remain stable, largely due to high downstream inventories, which have absorbed much of the cost pressure. A Tier 1 producer expects prices to stabilize rather than increase in the short term, as high downstream inventories continue to shield the market from upstream volatility.

## West Asia photovoltaic module prices



[Price divergence across the chain; module prices stall on weak ...]

2 days ago· Module prices in non-China markets Module prices by region: o Asia-Pacific: 1. Prices for Chinese exports to the Asia-Pacific come in at USD 0.085-0.090/W. 2. Modules are ...
